GALI and HLY in public policies

- **Estonian National Health Plan (NHP) 2009-2020** sets out the strategic objectives for continual improvement in the health of the population.
- Development Plan of the Ministry of Social Affairs
- State Budget Strategy
- Estonian National Strategy on Sustainable Development
”**Sustainable Estonia 21**“.

All include LE and HLY at age 0, not other age-groups are monitored.

National report about implementation of **Convention on the Rights of Persons with Disabilities** (2006) uses statistics based on GALI. Estonia ratified the Convention in 2012.

Population and housing Census 2011 included GALI question

LE and HLY in Estonian National Health Plan 2009-2020, target for 2016, 2020 and actual

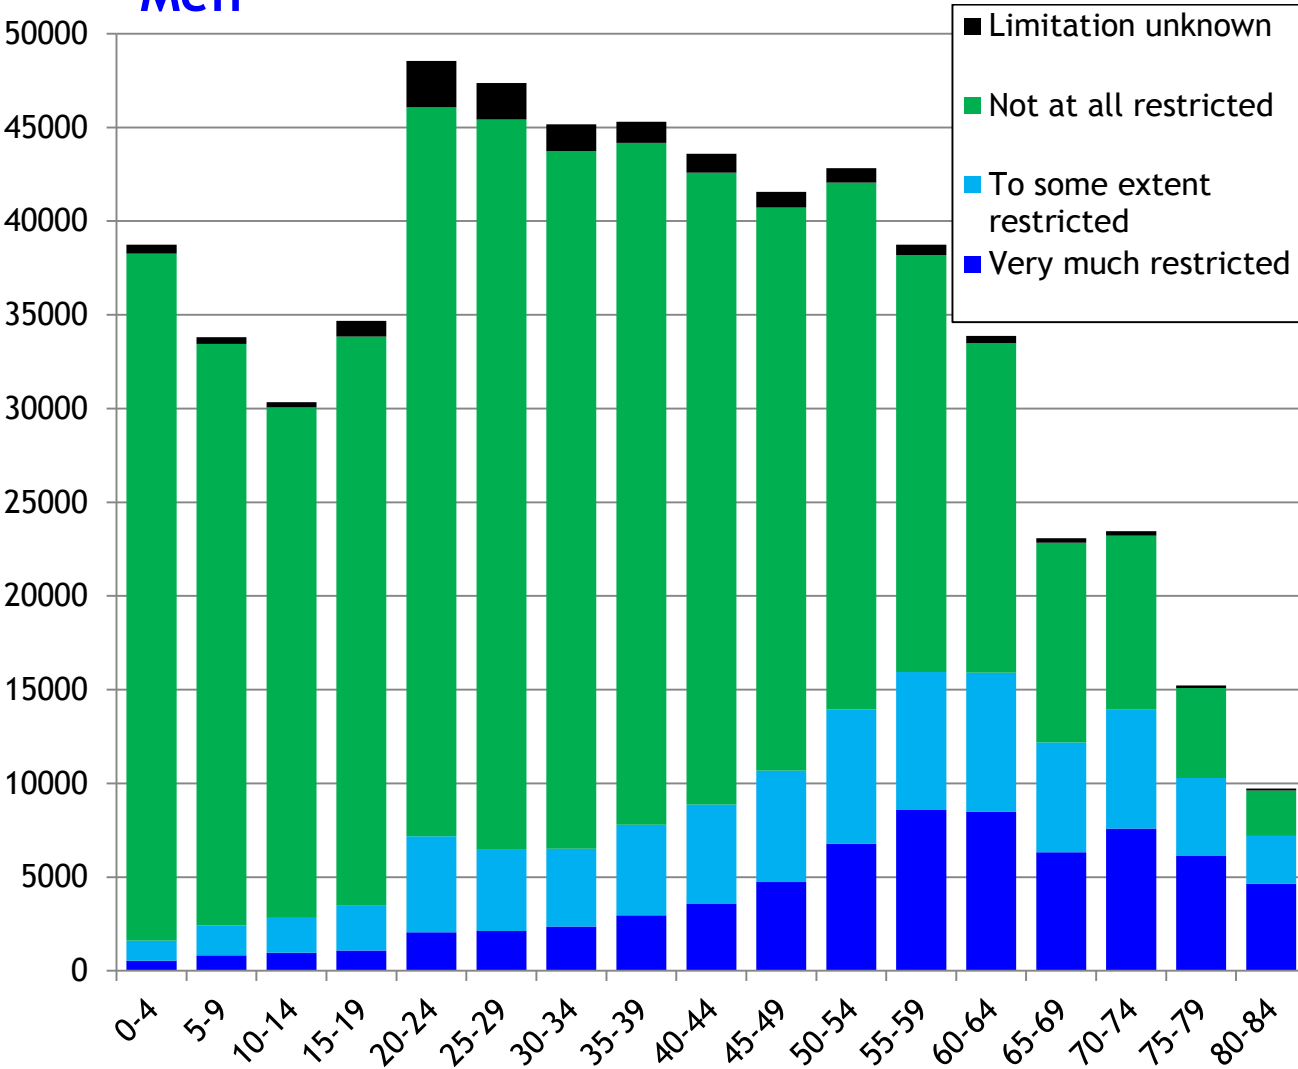

Recent mid-term assessment analyses of NHP: fulfillment of main objectives of health policy has slowed down (LE) and HLY have even decreased during the years 2009-2016 – for men 1.4 years and for women 3 years.
