# Healthy Life Years in Hungary - Briefly

Zsuzsanna Kéki, András Wéber

[Zsuzsanna.Keki@ksh.hu](mailto:Zsuzsanna.Keki@ksh.hu)

[Andras.Weber@ksh.hu](mailto:Andras.Weber@ksh.hu)

EHLEIS public meeting  
21st April 2017, Brussels, Belgium

**GALI from the survey: EU-SILC - every year**

**Original:** „For at least the past six months, to what extent have you been limited because of a health problem in activities people usually do?”

**Would you say you have been: (1) severely limited, (2) limited but not severely, (3) not limited at all**

**Hungarian versions EU-SILC 2006-2016: Every year a bit different grammatically, but the next phrases always included:**

- „For at least the past six months”
- „have you been limited”
- „in activities people usually do”
- „health problem”
- **Answers: (1) severely limited, (2) limited but not severely, (3) not limited at all**

**Method: Sullivan-method, Source: Health Expectancy Calculation by the Sullivan Method: A Practical Guide, 4th Edition, Carol Jagger, Herman van Oyen, Jean-Marie Robine, Newcastle University – Institute for Ageing, October 2014**

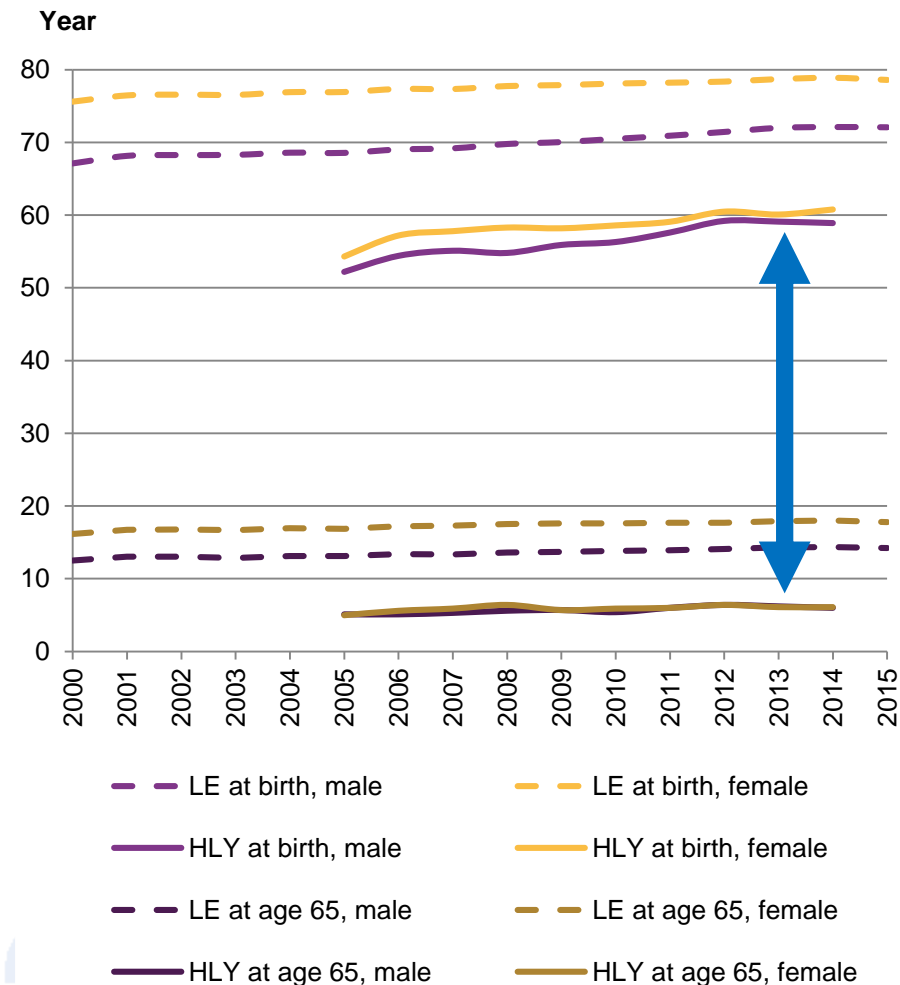

## Life Expectancy and Healthy Life Years at Birth in Hungary by Gender, 2000-2015

### LE and HLY Ranking of Hungary in the EU28

2014	LE		HLY	
(Place)	Male	Female	Male	Female
at birth	24.	25.	18.	17.
at age 65	25.	26.	24.	21.

### LE and HLY Values of Hungary

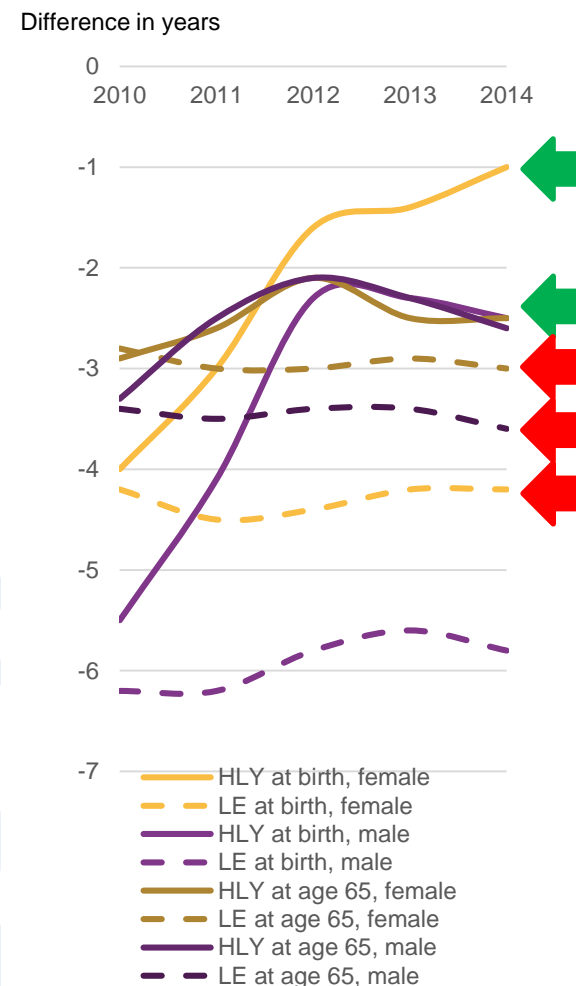

2014	LE		HLY	
(Years)	Male	Female	Male	Female
at birth	72,3	79,4	58,9	60,8
at age 65	14,6	18,6	6,0	6,1

Gap of Hungarian and EU28 average LE HLY value				
2014 (Years)	LE		HLY	
	Male	Female	Male	Female
at birth	-5,8	-4,2	-2,5	-1,0
at age 65	-3,6	-3,0	-2,6	-2,5

Changes of Gap of Hungarian and EU28 average LE HLY value				
2010-2014 (Years)	LE		HLY	
	Male	Female	Male	Female
at birth	-0,4	0,0	-3,0	-3,0
at age 65	+0,2	+0,2	-0,7	-0,4

Changes of the Gap of Life Expectancy and Healthy Life Years at Birth, between Hungary and the EU28 by Gender, 2010-2014

## Healthy Life Years at birth by Gender and their Differences, Eurostat vs HCSO, 2005-2015

Years	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
<b>Male</b>											
	52.2	54.4	55.1	54.8	55.9	56.3	57.6	59.2	59.1	58.9	
		54.7	55.3	54.7	56.0	56.5	57.3	58.9	59.2	59.2	
<b>DIFF</b>		+0.3	+0.2	-0.1	+0.1	+0.2	-0.3	-0.3	+0.1	+0.3	0.0
<b>Female</b>											
	54.3	57.2	57.8	58.2	58.2	58.6	59.1	60.5	60.1	60.8	
		57.5	58.0	58.3	58.7	58.9	58.8	60.2	60.3	60.9	
<b>DIFF</b>		+0.3	+0.2	+0.1	+0.5	+0.3	-0.3	-0.3	+0.2	+0.1	0,0

The cause of the differences is the HCSO calculation – For 2006-2014, the death data and the survey data are two-year averages, in order to minimize the standard error of the regional-level calculations. ([http://www.ksh.hu/thm/2/indi2\\_8\\_1.html](http://www.ksh.hu/thm/2/indi2_8_1.html))

From 2015, the regional calculation methods remain the same and the country calculation will be in line with the Eurostat recommendation – Consequently the differences going to be minimal.
